RULING ON ENTITLEMENT¹

On May 16, 2024, Nancy A. Carroll filed a petition for compensation under the National Vaccine Injury Compensation Program, 42 U.S.C. §300aa-10, *et seq.*² (the “Vaccine Act”) alleging that she suffered a shoulder injury related to vaccine administration (“SIRVA”) as a result of her October 28, 2022 influenza (“flu”) vaccination. Petition at ¶¶ 1-2. Petitioner further alleges that she received her vaccination in the United States, that she suffered the residual effects of her injury for more than six months, and that there has been no prior award or settlement of a civil action on her behalf as a result of her injury. See Petition at ¶¶ 1, 18, 22. The case was assigned to the Special Processing Unit of the Office of Special Masters.

If, upon review, I agree that the identified material fits within this definition, I will redact such material from public access.

² National Childhood Vaccine Injury Act of 1986, Pub. L. No. 99-660, 100 Stat. 3755. Hereinafter, for ease of citation, all section references to the Vaccine Act will be to the pertinent subparagraph of 42 U.S.C. § 300aa (2018).

On April 3, 2025, Respondent filed his Rule 4(c) Report Recommending Compensation and Proffer of Compensation in which he concedes that Petitioner is entitled to compensation in this case. ECF 29 at 1. Specifically, Respondent states that

[m]edical personnel at the Division of Injury Compensation Programs, Department of Health and Human Services (DICP), have reviewed the facts of this case and concluded that petitioner's claim meets the Table criteria for SIRVA. Specifically, petitioner had no history of pain, inflammation or dysfunction of the affected shoulder prior to intramuscular vaccine administration that would explain the alleged signs, symptoms, examination findings, and/or diagnostic studies occurring after vaccine injection; she more likely than not suffered the onset of pain within forty-eight hours of vaccine administration; her pain and reduced range of motion were limited to the shoulder in which the intramuscular vaccine was administered; and there is no other condition or abnormality present that would explain petitioner's symptoms. 42 C.F.R. § 100.3(a), (c)(10). Therefore, petitioner is entitled to a presumption of vaccine causation.

Id. at 3. Respondent further agrees that

[w]ith respect to other statutory and jurisdictional issues, the records show that the case was timely filed, that the vaccine was received in the United States, and that petitioner satisfies the statutory severity requirement by suffering the residual effects or complications of her injury for more than six months after vaccine administration. See 42 U.S.C. §§ 300aa-11(c)(1)(D)(i). Petitioner also avers that she has "not previously filed a petition under the Vaccine Act and [has] not previously collected an award or settlement of a civil action for damages secondary to receipt of the [flu] vaccine. Ex. 3 at 7.

Id.

In view of Respondent's position and the evidence of record, I find that Petitioner is entitled to compensation.

IT IS SO ORDERED.
